Informational Issues

I-01. Withdrawals queued for the existing StargateModule can be callable by anyone for a period of time

Description: Following the deployment and configuration of the new `StargateModule` and the removal of the existing `StargateModule` from the `modulesCanRequestWithdraw` mapping, any queued withdrawal to the old module can be executed by anyone, resulting in the funds being moved to the old module.

Recommendation: Stop processing withdrawals to the old module prior to upgrade and ensure that the old module is not removed from the `modulesCanRequestWithdraw` until later.

Customer's response: Fixed in [0299364919](#)

Fix review: Fix confirmed

Disclaimer

Even though we hope this information is helpful, we provide no warranty of any kind, explicit or implied. The contents of this report should not be construed as a complete guarantee that the contract is secure in all dimensions. About Certora

Certora is a Web3 security company that provides industry-leading formal verification tools and smart contract audits. Certora's flagship security product, Certora Prover, is a unique SaaS product that automatically locates even the most rare & hard-to-find bugs on your smart contracts or mathematically proves their absence. The Certora Prover plugs into your standard deployment pipeline. It is helpful for smart contract developers and security researchers during auditing and bug bounties.

Certora also provides services such as auditing, formal verification projects, and incident response.
