M-01: `awardStaked` functions approve ETHFI to the wrong address

Severity: Medium	Impact: Medium	Likelihood: High
Files: src/cashback-distributor/CashbackDistributor.sol	Status: Fixed	

Description:

The `CASHBACK_DISTRIBUTOR_ROLE` is able to award recipients with sETHFI shares by staking ETHFI into the sETHFI liquid vault. Firstly, the Teller contract is approved to spend the ETHFI and then the call to the Teller is made.

However, the Teller then calls `sETHFI.enter()` which pulls the tokens from the original caller via the `from` parameter. Therefore, the token transfer will revert because the approval from the CashbackDistributor was made to the Teller, not the sETHFI vault.

Recommendations:

Approve the sETHFI vault to spend the CashbackDistributor's ETHFI tokens.

Customer Response:

Fixed in [Odda38da15](#)

Fix Review:

Fix confirmed

About Certora

Certora is a Web3 security company that provides industry-leading formal verification tools and smart contract audits. Certora's flagship security product, Certora Prover, is a unique SaaS product that automatically locates even the most rare & hard-to-find bugs on your smart contracts or mathematically proves their absence. The Certora Prover plugs into your standard deployment pipeline. It is helpful for smart contract developers and security researchers during auditing and bug bounties.

Certora also provides services such as auditing, formal verification projects, and incident response.
